

Fresno County Sheriff-Coroner's Office Owner Applied Number Program

- The Owner Applied Number (OAN) program was created in an effort to combat rural and agriculture related crime throughout the United States. Each state and county is assigned a unique number which is recorded in the Nation Crime Information Center (NCIC). A directory of numbers is available to each law enforcement agency for use in identifying the various states and counties. County sheriff's offices or farm bureaus within each state issue the remaining portion of the number assigned to the individual requesting the OAN. The OAN is assigned to that individual permanently.
- The OAN is generally comprised of ten characters. The following is an example of what an OAN may look like:
